

FACTS ABOUT SLEEP

Children aged 6-12 years old usually need between 10 and 11 hours sleep every night (some may need more or less). To wake up at 7am in time for school, a good time to go to bed is before 9pm.

Doing something relaxing in the hour before going to sleep can really help. This could be things like reading a book or listening to a story being read, having a bath, cuddling a pet, talking to someone in your family about your day, or playing a board game or puzzle.

Spending time outside during the day and exercising can help someone fall asleep and help them to sleep well.

Keeping to the same routine is a good idea, such as going to bed and waking up at the same time every day, even at weekends.

SLEEP

**FEEL
happy**

People who get good quality sleep are more likely to...

**MAKE
GOOD
decisions**

PERFORM
better at sports

GET BETTER
scores in exams

**AVOID
illness**

**LEARN
better**

BE MORE
creative

**REMEMBER
more**

FEEL
healthier

**HEAL FASTER
from an injury**

PUBERTY & SLEEP

As we get older, our sleep needs and patterns change. As children become teenagers, they need a bit less sleep each night (usually about 9 or 10 hours sleep per night).

Teenagers usually want to go to sleep and wake up about 2 hours later than younger children or adults. This is called a shift in their "internal body clock".

During puberty, a person's body produces new hormones and this mostly happens when they are in a deep sleep.

By getting good sleep the body can grow and develop during puberty. This will help to improve memory and learning. Good sleep might also reduce some other issues during puberty such as moodiness, getting spots or putting on weight.

QUESTION	ANSWER
How much sleep do children need each night?	
Find 3 things to start doing that help someone get good sleep:	
Find 3 things to stop doing that would help someone sleep:	
What happens during sleep when someone starts puberty?	
Why is it important to get good sleep?	
*CHALLENGE question: Why is it more important to get sleep during puberty?	

It is difficult to go to sleep when...	A solution to this might be....
Someone has been watching TV, or playing games online before bed	
Someone is nervous or worried about something, e.g. a test at school	
Someone drinks a sugary drink, such as orange juice or hot chocolate, before bed	
Individual steps I would need to take to carry out the sleep solution
